Function to compare time:-

The screenshot shows the Node-RED web interface. On the left, the 'filter nodes' sidebar is visible, showing categories like 'storage' and 'social'. The main workspace displays a flow with the following nodes: a 'timestamp' node, a 'function' node, a 'delay 5s' node, and a 'form' node. The 'function' node is selected, and its editor is open on the right. The editor shows the following JavaScript code:

```

1 var d = new Date();
2 var utc = d.getTime() + (d.getTimezoneOffset() * 60000);
3 var offset = 5.5;
4 newDate = new Date(utc + (3600000 * offset));
5 var n = newDate.toISOString();
6 var date = n.slice(0,10);
7 var time = n.slice(11,16);
8 global.set('time',time);
9 msg.payload = date + " " + time;
10 return msg;

```

The 'function' node is also labeled 'function' in the workspace. The 'delay 5s' node is labeled 'delay 5s'. The 'form' node is labeled 'form'. The 'timestamp' node is labeled 'timestamp'. The 'Medicine' node is also visible in the workspace.
